Re: WCSZ(AM), Sans Souci, South Carolina
Facility Identification Number: 25235
Redemptive Strategies Broadcasting, LLC ("RSB")
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed May 27, 2011, on behalf of former licensee WHYZ Radio, LP ("Radio"). Radio requests extension of the special temporary authority ("STA") granted on November 29, 2010, to operate Station WCSZ with an emergency nondirectional antenna and reduced power.¹ In support of the request, Radio states that it has applied for and been granted Construction Permit BP-20101112AXA, to modify the WCSZ facilities. Radio requests extension of STA to allow time for construction of the newly authorized, modified facilities.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WCSZ may

¹ WCSZ is licensed for operation on 1070 kHz with 50 kilowatts daytime and 1.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U). Construction Permit BP-20101112AXA authorizes a change to nondirectional operation during daytime hours (DA-N-U).

continue to operate with an emergency nondirectional antenna and reduced power not to exceed 12.5 kilowatts daytime and 0.35 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for license to cover the construction permit will be filed prior to the expiration date below. RSB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 2, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
